Department of  
Agriculture

Washington, D.C.

Released September 30, 1992, by the Agricultural Statistics Board. Estimates refer to September 1 and June-August 1992.

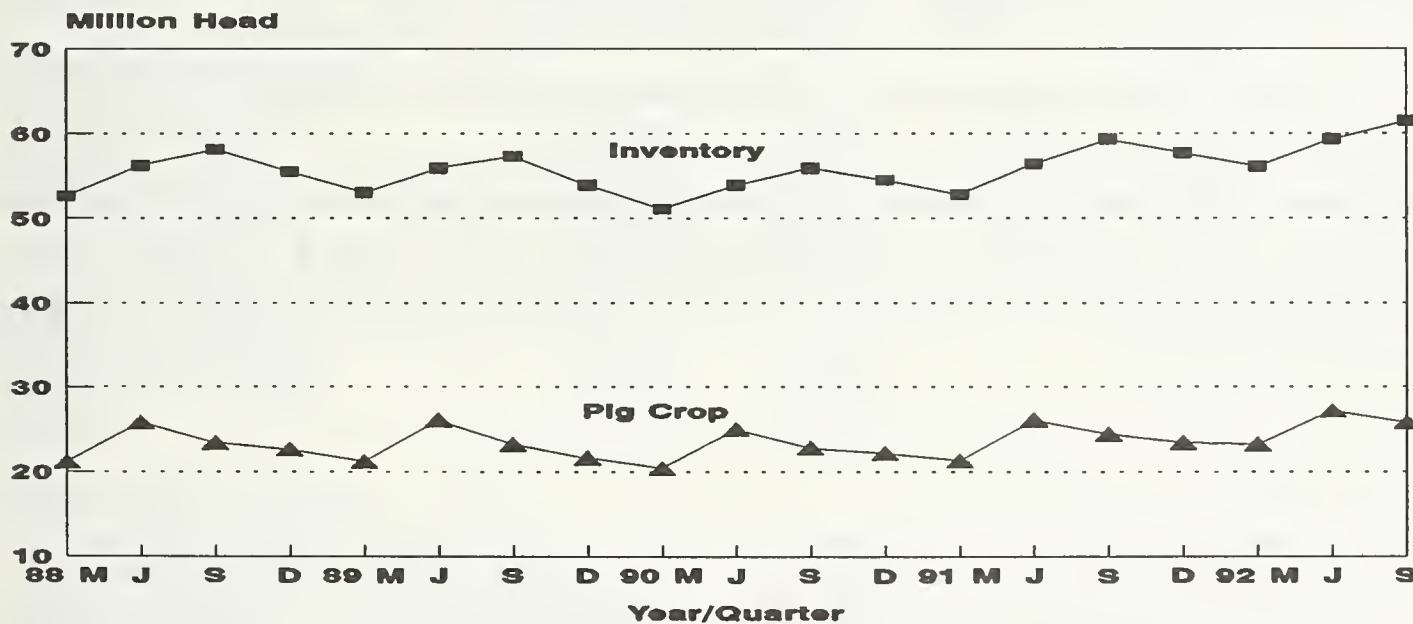

## U.S. Hog Inventory Up 4 Percent

U.S. inventory of all hogs and pigs on September 1, 1992, was 61.5 million head. This was 4 percent above last year and 10 percent above September 1, 1990.

Breeding inventory, at 7.41 million head, was up 2 percent from a year ago and 9 percent above September 1, 1990. Market hog inventory, at 54.1 million head, increased 4 percent from a year ago and was up 10 percent from September 1, 1990.

The June-August 1992 U.S. pig crop was 25.8 million head, 5 percent more than last year and up 13 percent from the same period in 1990. Sows farrowing during this period totaled 3.17 million head, up 2 percent from last year and 10 percent above 1990. Pigs saved per litter were a record high 8.13 compared to 7.89 during the same period in 1991.

## September 1 Inventory & Pig Crop United States

Index is located at the end of the report. For information call Hubert Hamer (202) 720-3106. Office hours are 8:00 a.m. to 4:30 p.m. ET.

U.S. hog producers intend to have 3.07 million sows farrow during the September-November quarter, 3 percent more than the actual farrowings during the same period last year and 8 percent more than in 1990. Farrowings intended for December 1992-February 1993, at 2.98 million sows, are 3 percent above 1992 and up 10 percent from 1991.

## 16 State Inventory Increases 4 Percent

The 16 quarterly States, with an inventory of 56.1 million head on September 1, 1992, were up 4 percent from last year and 10 percent above September 1, 1990. These 16 States accounted for approximately 91 percent of the total U.S. hog and pig inventory.

In the 16 quarterly States, the June-August pig crop was 23.5 million head, up 6 percent from last year and up 14 percent from two years ago. There were 2.89 million sows that farrowed during June-August, up 2 percent from a year earlier. Sows farrowing during June-August 1992 in the 16 States averaged 8.14 pigs per litter, compared to 7.89 during the comparable period a year ago.

Intentions in the 16 quarterly States for September-November sows farrowing are 2.80 million head, up 4 percent from the corresponding period last year and 9 percent above two years ago. December 1992-February 1993 intended farrowings, at 2.71 million head are up 3 percent from a year earlier and 11 percent more than in 1991.

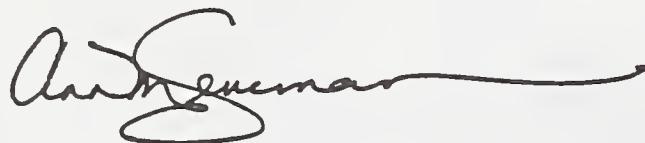

### \*\*\*\*\* Notice \*\*\*\*\*

NASS will replace the 10 State summary tables on Pages 5-6 with comparable 16 State tables effective in the December 1992 report. The December 1992 inventory report will be published on December 30, 1992, instead of the January 1993 release.

\*\*\*\*\*

---

This report was approved on September 30, 1992, by the Acting Secretary of Agriculture and the National Agricultural Statistics Service's Agricultural Statistics Board.

Acting Secretary of  
Agriculture  
Ann Veneman

Agricultural Statistics Board  
Chairperson  
Rich Allen

1/ Number of pigs born September-November, were on December 1, or had been sold.

2/ Intentions.

3/ Individual State estimates not available for the 34 other States.

## Reliability of September 1 Hogs and Pigs Estimates

**Survey Procedures:** A random sample of U.S. producers was surveyed to provide data for these estimates. Survey procedures ensured that all hog and pig producers, regardless of size, had a chance to be included in the survey. Large producers were sampled more heavily than small operations. Data were collected from about 76,000 operators during the first half of September by mail, telephone, and face-to-face personal interviews. Regardless of when operators responded, they were asked to report inventories as of September 1.

**Estimation Procedures:** These hogs and pigs estimates were prepared by the Agricultural Statistics Board after reviewing recommendations and analysis submitted by each State office. National and State survey data were reviewed for reasonableness with each other and with estimates from past years using a balance sheet. The balance sheet begins with the previous inventory estimate, adds to it estimates of births and imports, and subtracts estimates of slaughter, exports, and deaths. This indicated ending inventory level is compared to the Agricultural Statistics Board estimate for reasonableness.

**Revision Policy:** Revisions to previous estimates are made to improve quarter to quarter relationships. Estimates for the previous quarter are subject to revision when current estimates are made. In September, estimates for the previous June are reviewed and in December, estimates for all quarters of the previous two years are reviewed. The reviews are primarily based on hog check-off receipts and hog slaughter. Estimates will also be reviewed after data from the Department of Commerce's five-year Census of Agriculture are available. No revisions will be made after that date.

**Reliability:** Since all operations raising hogs are not included in the sample, survey estimates are subject to sampling variability. Survey results are also subject to non-sampling errors such as omissions, duplications, and mistakes in reporting, recording, and processing the data. The effects of these errors cannot be measured directly. They are minimized through rigid quality controls in the data collection process and through a careful review of all reported data for consistency and reasonableness.

To assist users in evaluating the reliability of the estimates in this report, the "Root Mean Square Error" is shown for selected items in the table below. The "Root Mean Square Error" is a statistical measure based on past performance and is computed using the differences between first and final estimates. The "Root Mean Square Error" for hog inventory estimates over the past 16 quarters is 0.9 percent. This means that chances are 2 out of 3 that the final estimate will not be above or below the current estimate of 61.5 million head by more than 0.9 percent, or about 554,000 head. Chances are 9 out of 10 that the difference will not exceed 1.6 percent, or about 985,000 head (the 90 percent confidence level).

Reliability of September 1 Hog Estimates 1/

		90% Confidence Level	Difference Between First and Final Estimates <u>2/</u>			Number of Quarters <u>3/</u>			
		Root Mean	Square Error Percent: (000): Average: Smallest: Largest: Above: Below : Head:			First : First : Final : Final			
		-- Percent --		1,000 Head			- Number -		
All Hogs & Pigs		0.9	1.6	985	-41	0	-1,130	8	7
Pig Crop		1.3	2.3	592	61	0	-562	6	9
Expected Farrowings									
Next Quarter		2.9	5.0	153	-8	-8	132	10	6
Following Quarter		4.0	7.0	209	11	-2	214	9	7

1/ Based on quarterly records for the past 16 quarters.

2/ Records for the past 16 quarters.

3/ There was no change from first to final estimates of All Hogs & Pigs and Pig Crop in 1 of the 16 quarters represented.

The next "Hogs and Pigs" report will be released at 3:00 p.m. ET on December 30, 1992
